Projects

Pro password Generator 🔗

- The project's password generation logic is likely designed to ensure that the generated passwords are strong and secure by using a combination of letters, numbers, and special characters.
- The project likely has an intuitive and user-friendly interface that allows users to easily generate strong and secure passwords.
- The password generator may offer various customization options such as password length and character types to ensure that generated passwords meet the user's requirements.

Skills Developed: Javascript, HTML, CSS

Tic Tac Toe Game 🔗 ⟨⟩

- Tic Tac Toe is a classic two-player game where each player takes turns marking a square on a 3x3 grid with their respective symbol (X or O) until one player has three in a row horizontally, vertically, or diagonally.
- Project is built using HTML, CSS, and JavaScript. HTML is used to create the structure and content of the game's web page, CSS is used to style and visually enhance the page, and JavaScript is used to implement the game's logic and behavior.
- The project allows players to take turns marking squares on the grid and declare a winner once a player gets three in a row.

Skills Developed: HTML, CSS, Javascript
